The map illustrates some of the varied military factors that may result in the opening of a second front, not in France or Norway, but in Southern Europe. Principal stake in the great battle now raging in North Africa is control of the 1,000 mile shoreline on the vital Mediterranean from Tripoli to Alexandria, the gateway to South ern Europe.

American Forces Arrive In Palestine And Syria

Rommel's Forces In N. Africa Are Retreating

AMERICAN MARINES AND SOLDIERS FORCING THE JAPANESE BACK ON GUADALCANAL ISLAND ALTHOUGH THE SITUATION IS SERIOUS THERE, SAY OFFICIALS.

BULLETINS.

American troops have arrived in Palestine and Syria to reinforce British forces in those sectors.

◆ ◆ ◆

Field Marshall Rommel, leading German forces in North Africa, has abandoned his El Alamein positions and is retreating in a Westward direction, as the British offensive gains strength. Reports state that Rommel has suffered heavy losses in the clash of tanks and artillery.

◆ ◆ ◆

The American Marines and soldiers are forcing the Japanese to retreat in Guadalcanal Island, although the situation there is described as serious since the Japanese have landed new forces on the Eastern coast. The Americans are pushing the Japanese back with land, sea and air assualts. General MacArthur's forces are closing in on the Japanese who are heading toward Buna on the North Coast of New Guinea. The Allied air force is busy in that sector.

◆ ◆ ◆

Reports from India state that the Japanese patrol are active on the India and Burma frontier.

More Japanese forces have made landing on Guadalcanal, according to the United Navy. Surrounded by American destroyers near the island and with American planes on the island, the Japanes emade new landing to the East of the airfield. The landing was made Monday night. Most other landings were made on the Western part of the island. The new landing, places the Americans between two strengthened enemy forces.

The British Eighth Army won the first round of the war in North Africa breaking through the axis lines Monday in a tank battle. Marshal Erwin Rommel withdrew his tank force from the battle and called on his artillery to cover his retreat, these reports said.

The great clash of armor started when Rommel threw his tanks into the breach which the British had opened at the northern end of the Alamein line. But the British force was too strong for him.

He ordered his tanks to break off the battle and brought all available antitank guns into the area to form a gun defense to replace the fortifications which the British had broken through.

Red Cross Is Thankful For Cooperation Given Sewing Room In City

Response Is Generous From Citizens; One Man Contributes Sack Of Buttons To Be Used In Program.

Red Cross Executives take this means of thanking those who brought in the large white buttons. The response was quite generous. Different clubs and schools responded with collections as well as individuals. One elderly gentleman came in with a sack of buttons saying that he and his wife had been saving buttons for more than twenty years and they didn't know what they would ever be used for. He was so glad that he could give them to the Red Cross to be used on pajamas for the armed forces, because he felt he was helping just that much. He has two sons in the service of our country and he knows what it means to be in war.

We are making another plea this week for smaller buttons. We want white buttons about one-half inch in diameter to be used on women's flannelette gowns. We have 406 of these gowns already cut and ready to be made. They are for convalescent refugee women. Anyone who can sew is really needed in our work-room or the garments can be taken into the home and completed. Please respond to this call because we still have one-half of the 'quota of men's pajamas yet to be made. You see there is an urgent demand for seamstresses.

The local Red Cross is certainly indebted to the manager of Betty Jane Dress Factory for the service he has rendered. His factory furnished the thread and worked the buttonholes in 110 boys shirts, each shirt having seven buttonholes. This was indeed a great help to our sewing department and we take this means of publicly thanking him and his employes for this work.

We also wish to thank Mrs. Sol Weisman for donating a pair of large scissors, which were badly needed in our cutting department.

The Surgical Dressing department is still waiting for gauze to continue their work. They are ready for action as soon as it arrives and will announce it through these papers. Keep the Red Cross in mind and Remember, Red Cross Needs you.

PUBLICITY CHAIRMAN.

Voting In U. S. Light As Republicans Take Leads In New Jersey, Oklahoma

DEWEY PROJECTS HIMSELF INTO THE 1944 PRESIDENTIAL PICTURE; HAMILTON FISH HAS SLIGHT MARGIN FOR CONGRESS.

Republicans took a surprising lead in New Jersey, Oklahoma, and other States in Tuesday's general election. Thomas Dewey, young attorney, was elected New York's first Republican Governor in twenty years. John J. Bennett, Jr., his Democratic opponent conceded defeat shortly after the polls closed and the votes started to come in.

Hamilton Fish, the Republican Representative from New York whom both Presildent Roosevelt and Wendell L. Willkie tried to retire to private life, had a slim margin over Ferdinand A Hoyt. Democratic and American-Labor nominee.

The returns from the elections elsewhere in the nation were full of potential upsets. In New York's neighboring State of New Jersey Albert W. Hawkes, Republican and former President of the United States Chamber of Commerce, held a strong lead over the incumbent Democratic Senator, William H. Smathers.

Down in Oklahoma, Senator Josh Lee, Democrat was trailing in his re-election attempt. His opponent was E. H. Moore, independent oilman and anti-new deal Democrat running on the Republican Ticket.

◆ ◆ ◆

Norris Running Behind.

George W. Norris, 81-year-old Independent Senator from Nebraska, seemed in danger of tasting the bitter cup of political defeat in the twilight of his years. He was running second to Kenneth Wherry, Midwest manager of the Republicans, while Foster May, Democrat and former news radiocaster, was third.

From Iowa came tidings that Gov. George A. Wilson, Republican aspirant to the United States Senate, was ahead of Senator Clyde L. Herring, Democrat. Bourke B. Hickenloper, Republican Lieutenant Governor, trying for the governorship, had a 2-to-1 lead over Democratic Gov. Nelson A. Kraschell on the basis of very incomplete figures.

End Of Strike On McKinney Hospital Seen

Head Of Carpenters Sending Instruction To Certify Workers.

(Wednesday's Dallas News)

A strike that Monday halted construction on the new $3,000,000 United State Army general hospital at McKinney may be ended shortly, reports from Washington indicated Tuesday night.

President John P. Coyne of the International Building and Construction Trade Council, Washington, said that he had instructed the Dallas council to permit certification of carpenters for the Collin County work, which had been previously refused.

◆ ◆ ◆

Council Head Silent.

P. M. Lauglin, President of the Dallas Building and Construction Trade Council, said that he had not received the instructions and refused to comment on the dispute.

"The dispute is now a strike," a spokesman said at the Southwest division office of the United States Engineers.

Because a prime contractor on job was operating an open shop, the engineers office reported, the Dallas Building and Construction Trades Council had refused to permit certification of carpenters for the job.

Ten carpenters had been certified Thursday by R. L. Pollard, business agent of local 198 nere, when he received instruction from the council to certify no more. Those ten men were pulled off the job Monday, the engineers' office said.

◆ ◆ ◆

Work Behind Schedule.

W. G. Reid of the Reid-Kane Construction Company, the principal contractor, notified Coyne.

The Parrott-Oldt Construction Company of Dallas, which has the contract for constructing underground facilities, the engineers' office said, was operating on the open-shop plan. The work of that company was the only activity under way at the new hospital Tuesday.

Approximately 100 carpenters are needed on the job at its present stage, the engineers' office said, and the difficulty put work on the hospital behind schedule.

Voters, Showing Little Interest, Give Majority To Democratic Candidates

VOTE IS ONE OF LIGHTEST IN HISTORY OF COUNTY; ONLY SEVEN VOTING PRECINCTS REPORT ELECTION RETURNS TUERDAY NIGHT TO THE ELECTION BUREAU.

Casting one of the lightest votes in history, Collin County voters went to the polls in Tuesday's general election in small numbers, showing little or no interest in the baloting for state and senatorial candidates and in the five amendments being voted on.

Indicating the small vote, thirty-six voting precincts, reporting up to noon Wednesday, had cast a vote of approximately 1,700 votes.

There was little on the ballot to arouse the interest of the average voter and most of them stayed at home during the day. Less than 500 votes were cast in McKinney's six voting precincts and only seven returns came in to the Collin County Election Bureau Tuesday night, the six from McKinney and North Farmersville.

Eighteen returns were received on election night two years ago, when President Roosevelt was reelected President for the third term.

The vote from forty-one voting precincts in the county for Governor, United States Senator, Governor and the five amendments follows:

◆ ◆

For United States Senator.

O'Daniel, 1868.
Lawson, 47.
Sumerville, 0.

◆ ◆ ◆

For Governor.

Stevenson, 1901.
McDonald, 48.

◆ ◆ ◆

Amendments.

John Tarleton Appropriation, 381, against 524.

Military Instructors, for 329, against 533.

Anti-Deficit, for 528, against 410.

Probate Jurisdiction, for 309, against 529.

Schools Meet Demands For War Service

A tremendous demand has been made on the Texas public effort and it has and is responding in the fullest to meet all expectations, according to preliminary reports released by State Superintendent L. A. Woods.

Primarily the state system was called upon to co-operate in sales of war stamps and bonds, sugar and gasoline rationing, collection of scrap metal wherein the school children collected 24,160-975 pounds and 208,025 pounds of rubber. putting through an educational program with the Office of Price Administration in buying and conserving, and promotion of the high school victory corps of physical fitness.

Additional demands have been made on the home-making staff with the program extended to sixty more schools with 20,000 pupils.

Rural war production training is comprehensive with a view of obtaining a maximum production through the division of vocational agriculture. It is supervised by fifteen departmental members, assisted by 622 local school administrators. There were 58,882 trainees last scholastic session costing the Federal Government $1,109,755 and the state nothing. It is all done by effort of the public schools and includes supervision, organizing and conducting rural war production programs and teaching its courses, including metal and commodities. There were 73,782 individuals in organized vocational agriculture instruction last scholastic year and there are twice that number this year.

Increased demands have been made on the industrial and distributive education division with 125,000 adults already given training. The enrollment during the current bienium is 56,000 per year as compared to 40,600 annually during the preceding biennium. At the instance of the Army and Navy the program was expanded to include electricity, auto mechanics, radio and machine shop in order that high school graduates might possess skills to meet the needs of the armed forces.

Changes In Navy Enlistments Made Known

Men interested in enlisting in the Navy construction regiment were advised to make application prior to November 2, by Russell W. Bryant, recruiter in charge of the Sherman Navy recruiting district. "Changes have been made in the schedules of interviewing officers and men who failed to obtain interviews will have to wait until November 17," the recruiter said.

Ratings are open for enlistment in the construction regiment now that include virtually every type of construction work, with pay ranging from $54 to $126 a month, in addition to family allowances, overseas bonus and all expenses but the recruiter pointed out that there is no way of predicting how long the ratings will remain open.

The 18-19 year old boys and their parents are showing a great deal of interest in the Navy's trade training program, the recruiter said, "Parents realize that their boys wil lhave little opportunity to complete an education and so are turning more and more to the Navy for vocational training. They are beginning to understand that a Navy trained craftsman is a thoroughly trained craftsman, and not just a specialist in a small part of some particular trade. This means that a Navy trained man will be able to hold down a responsible position at a good salary in civilian life."

Parents of boys in the ages to be affected by the proposed lower draft age bill are invited to call at the Navy recruiting station in the Sherman federal building any day in the week for information. For the convenience of those in the outlying sections of the Sherman district a traveling recruiter visits the McKinney post office each Monday and Tuesday, Gainesville "Victory House" each Wednesday, Denison post office each Thursday and Denton post office each Thursday and Saturday.

The Sherman district is standing in fourth place in the Dallas recruiting district, it was announced this week, San Angelo, Amarillo and Fort Worth being the only substations leading the Sherman station. The Fort Worth station is the only station leading Sherman in number of men enlisted per recruiter on duty. There are 12 substations in the Dallas district.

The following enlisted through the Sherman Navy recruiting station duringt he past week:

Pharmacist mate, third-class: H. C. Parker, Blue Ridge.

Mess attendants, third-class (Negro): George English, Jr., Gunter.

Construction: A. E. McEuen, Colbert, Okla.; T. H. Middlebrooks, 714 N. Ritchie, Gainesville; R. L. Whitfield, 1117 W. Crawford, R. B. Horn, 918 W. Morgan, R. C. Bruton, Route 3, and F. L. Anderson, 908 W. Sears, Denison.

Mrs. Dewey Walley, just East of McKinney, was a McKinney shopper Saturday. She ordered the Weekly Democrat-Gazette sent to her daughter, Miss Mary Jo, a student at North Texas Teachers College, Denton. THE "KODIAK BEAR."

ANOTHER COPY OF THE "Kodiak Bar," published at Fort Greely, Alaska, reaches our desk. Corporal Max B. Skelton of this city, son of Prof. and Mrs. B. Frank Skelton, is Editor of this well edited and readable United States Army Camp newspaper. If you don't believe the place where the "'Kodiak Bear' 'is published is a long way off, just check on your map and see for yourself. Max is getting out a splendid paper, as we expected of him. He is a native of McKinney, a graduate of the McKinney High School and the University of Texas, and was Editor of "The Lion Roar," McKinney High publication and "The Daily Texan," official publication of the University of Texas. He formerly worked on these papers as a reporter and is a fine young newspaperman. We know he is enjoying getting out the army camp newspaper and he's doing a fine job of it, too.

GAS RATIONING CARDS.

COLLIN COUNTY SCHOOL teachers stand ready to act as government registrars for the gasoline rationing program, just as they did for the sugar rationing program last Spring.

Registration dates, changed from the original dates, will be November 12, 13 and 14, and State Superintendent L. A. Woods said in Austin that he would ask county and city superintendents to make school staffs available as registrars.

Superintendent Woods said he did not think school holidays would be necessary during the registration of automobile owners.

O. P. A. officials said the job of registering car owners would not be as big a job as war registration for sugar ration books because fewer applications will be received.

The plan calls for the school teachers to receive applications from passenger car owners and issue basic "A" ration books, entitling each holder to gasoline enough for 2,880 miles of travel yearly. Application forms for supplemental rations will be available at the schools, but will be filled out and presented later to county rationing boards.

The application blanks will be made available at county rationing board offices and tire inspection stations soon after November 7. It previously had been announced they would be distributed about October 27, but delay in printing them will postpone the date of their availability.

CAFE SERVES UNCLE SAM AND ALSO SAVES COFFEE.

MUCCI'S RESTAURANT AT Frankfort, Kentucky, recently requested patrons not to ask for that second cup of coffee. But still they asked, and always got it.

Friday the restaurant's mannager, Contantine M. Benassi, topped his menu with this declaration:

"Due to coffee rationing, if you ask for a second cup of coffee we will expect you to buy a 25c war stamp from the cashier when you pay your check."

AMERICA'S EATING HABITS TO CHANGE.

SOME BIG CHANGES ARE near in America's dining out habits, but they won't work hardships, just inconveniences, says Sidney Hoedemaker, of Los Angeles President of the National Restaurant Association.

Here are the changes which Hoedemaker forecasts:

1. Simplification of menus, resulting in lack of waste and more time to prepare food properly.
2. Meatless days.
3. Limits on butter, cheese, and other items now unrestricted.
4. No more truffles, canned mushrooms, sardine, caviar, and other so-called luxury foods.
5. Elimination of tablecloths, unnecessary china, and silverware.
6. Customers' self-service, probably of a "buffet supper" rather than a cafeteria type.
7. Transferring restaurants and out-of-the-way dining spots to central locations more easily accessible.
8. Increasing numbers of diners out, because women employed in war plants haven't time to prepare meals at home.
9. Mass movement of women back to the kitchen as men cooks and waiters entered armed services of war industries.
10. Development of industrial cafeterias — portable canteens capable of serving thousands of workers.

Hoedemaker believes the customers will benefit because, he said, they've been eating too many deserts too much cream and sugar, and too much meat and heavy food for good health.

John Allen Dyer, who is in the U. S. Army at present, stationed in Massachusetts, has arrived for a visit with his wife, the former Miss Dorothy Jean Myrick, and his Mother, Mrs. Helen Dyer and other relatives.

Registration For Mileage Rationing November 12 to 14

Registration for mileage rationing in Collin County will be conducted November 12, 13 and 14, Elton Riggs, Chairman of the Collin County War Price and Rationing Board says, and actual rationing of gasoline will begin November 22.

"We have been advised that Washington expects to have the application blanks available by November 7," Mr. Riggs said, but everyone should watch the newspapers for our announcement when these application forms are available. We will try to see that they are distributed at garage tire inspection stations where every passenger car owner can obtain an application form conveniently."

He said each motorist should fill out the form listing the serial number of each tire. Then on one of the registration days the motorist should present this application form at the high school nearest his residence: Anna, Westminster, Blue Ridge, Farmersville, Nevada, Wylie, Plano, Allen, Frisco, Prosper, Celina, Princeton, McKinney, to be issued a basic "A" ration book for gasoline. Any motorist who is away from home in another county should register wherever he is on one of those three days, November 12, 13 and 14

School officials have been requested by the County War Price and Rationing Board to cooperat in the registration as was done in the sugar rationing registration last May.

Schools will not need to be dismissed during the registration.

Mr. Riggs said the Board has completed setting up a fuel rationing panel to handle applications and other matters which the mileage rationing program will entail.

"Those who feel they are entitled to a supplemental ration provided by the 'B' or 'C' books should obtain another application form for this at the place of registration where the 'A' book is issued," Mr. Riggs explained.

He emphasized that every passenger car owner must sell to the Government before November 12 al tires over five for each vehicle.

"That means," he explained, "that the car owner is allowed one tire for each running wheel and one spare for the car. A registrar can not only issue him a mileage rationing book for that car if he owns tires in excess of that number."

For that reason excess tires should be turned in before November 12 to a local Railway Express Agency which will tag the tire and the seller will receive a check from the Government, or if he chooses, the Government will pay him in War Stamps or War Bonds for his excess tire or tires.

Commercial vehicles, trucks and farm trucks must obtain a Certificate of War Necessity from the Office of Defense Transportation before they are registered for mileage rationing with the local War Price and Rationing Board. The ODT has mailed these forms to all owners of commercial vehicles that were registered last December 31. Persons who have not received these application forms should write immediately to the nearest ODT Field Office. In Texas these offices are located in Dallas, San Antonio, Houston, Lubbock and Austin. As soon as this form is received it should be mailed back to the ODT in time for the applicant to receive a Certificate of War Necessity by November 15 when it will become mandatory that every commercial vehicle and truck carry one of these certificates at all times.

Veterans World War I To Meet At Uvalde, Texas

Veterans of World War I from many parts of the State will gather at Uvalde, Texas, Sunday, Nov. 1, to select sites for Homesteads on a 3,000-acre irrigated colonization project, sponsored By the War Veterans Relief Association.

The Tract has been divided into ten-acre plats which are sufficient for the average family to become self sustaining, since the entire tract is in the Winter Garden Vegetable Growing Area and is now under irrigation. Food For Victory is the Basis of the entire program in which eventually 300 Ex-service men and their families will settle on the tract and raise food for the Army.

More than twenty of these tracts were sold when the first contingent of Veterans visited the site on Oct. 18th for the program of Dedication. As was the case when the first contingent visited the site, Veterans who visit the place on Nov. 1st will be tendered a real South Texas Barbecue Dinner.

Further information regarding the project will be given to any Veteran writing the War Veterans Relief Association, 1007 1-2 Main St. Dallas, Texas.

THRIFT IS NOT A HARDSHIP

It is no hardship to save all we can to invest in War Bonds. It's wise at any time to spend less than we earn, and to save something for a safe and comfortable future.

It is no hardship to learn to shop carefully . . . to buy good qualities of the things we need, and to make them last. It's quite easy and pleasant, in fact. It means only finding out which stores give you the most for your money.

Penney stores, as you probably know, have always avoided those extra services that send prices up.

Penney stores, and Penney policies are, today, in wartime, better than ever suited to the needs of the American family.

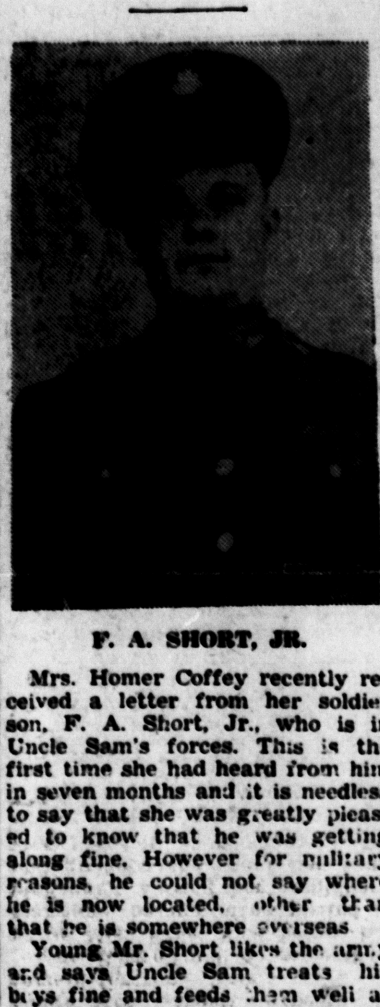
Mrs. Homer Coffey Hears From Son, F. A. Short, Jr.



F. A. SHORT, JR.

Mrs. Homer Coffey recently received a letter from her soldier son, F. A. Short, Jr., who is in Uncle Sam's forces. This is the first time she had heard from him in seven months and it is needless to say that she was greatly pleased to know that he was getting along fine. However for military reasons, he could not say where he is now located, other than that he is somewhere overseas.

Young Mr. Short likes the army and says Uncle Sam treats his boys fine and feeds them well at all times. He is only too glad to be able to serve his country wherever he is needed. This bespeaks the spirit of all our boys who have gone out into the different branches of the services and putting forth every effort to end this war and restore peace to us again. This splendid young man is a member of Anti-Tank Co. 14 Inf. A. P. O.

Jackie And Jimmy Woods Oberve Ninth Birthday

Jackie and Jimmy Woods, twin sons of Mr. and Mrs. E. L. Woods, are today Wednesday November 4, celebrating their ninth birthday. These fine little fellows were born in McKinney and are a favorite with adults as well as with their host of little playmates and school friends. They are active in Sunday School, being regular attendants at the First Baptist Church, and are real boys, enjoying football and other games that keep lads of this age occupied.

Mr. and Mrs. Woods have another son, Bobby, who is two years older than the twins, and is also popular with his associates.

We join with the numerous other friends of Jackie and Jimmy in extending birthday congratulations and wish for them many more happy occasions of the kind.

Information By Sel. Service

The Texas Selective Service System is cooperating with the War Department in complying with the Selective Service Act and Regulations relating to the selection and induction of negro registrants for the armed forces, declared State Selective Service Headquarters officials today.

"The Act provides that 'there shall be no discrimination because of race or color' and negroes are being inducted in the armed forces as fast as adequate facilities are provided and in the proper ration to their proportion to the State's available manpower," State Headquarters officials said.

Admitting that it is logical to conclude that eligible single men, both white and colored, should be delivered for induction before married men, are called, and that married men, both white and colored, with dependent wife only should be called before married men with wife and children, it was pointed out that when the War Depatrment issues a call for men the State Headquarters does not have the privilege of deciding how many white men and how many negroes shall be furnished to meet the quota.

"The War Department calls specificly the number of white and the number of negro registrants the State will deliver for induction on given dates. These calls are apportioned among the local boards of the State, based on the proportion of the total number of white available men and the total number of colored available men each local board has in relation to the total available men in the State.

"For example, if the War Department calls on Texas for 8,000 negroes and there are 8,000 negro registrants in Category II(single men with dependents), Category I having been exhausted, then the State Headquarters would call on the local boards having negro registrants in that category to fill the call. Some of the State's local boards would not be called on for any men for this call for the reason that there are counties in Texas having no negro registrants, others having comparatively few, while many Texas counties have more negro than white men eligible for induction.

"The same procedure would apply to a call for, say 15,000 white men. Some local boards might be compelled to skip over single negro selectees and even induct some white men in Category III (married men with dependent wife) in order to fill the call. Of course, available negro registrants whose numbers are passed in filling a call for white men are picked up on a future call for negro selectees.

"Naturally, all conditions and regulations governing the reclassification of Selective Service registrants are applicable alike to white and negro registrations, and cases are reopened and reconsidered for possible reclassification on the basis of the registrant's order number."

Approximately 15 percent of the State's total available manpower is negro, State Headquarters officials said.

The condition of Chas. T. Ritch, who is a patient in the McKinney City Hospital, where he underwent a major operation Friday, is reported to be about the same Thursday. He was resting fairly well Thursday morning.

Prevailing Milk Prices Paid Collin Farmers Best Since World War No. 1

EARLE CABELL, GENERAL MANAGER OF CABELL'S, INC., CALLS ATTENTION TO RECENT ADVANCES IN PRICES: URGES FARMERS TO SELL TO THEIR NEAREST STATION.

The prevailing milk prices paid to Collin County farmers are the best in the county since World War I, through recent advances in the price, says Earle Cabell, General Manager of Cabell's, Inc. With army contracts and in view of civilian shortages in this territory for fresh milk Cabell's will be in a position to pay the top prices of any market in the South.

Because of the guarantee of the best possible prices and the urgent necessity of saving tires and trucks, Mr. Cabell says it will be a patriotic pleasure of farmers to demand their milk be brought to the nearest market, and that Cabell's Inc., of McKinney, centrally located. offers an ideal market for farmers in this section of Texas.

He appeals to farmers to thus sell their milk to the nearest milk station which will aid in saving tires, gas and trucks, and that they are guaranteed top market prices.

The milk shed, embracing Dallas, Fort Worth and the metropolitan areas, is approximately twenty-five per cent short now of requirements of the army and civilian purposes. Mr. Cabell urges farmers producing milk to use every care in sanitation conditions and handling of milk, and also urges that they bring their milk to the road when on side roads.

SECRETARY OF NAVY FRANK KNOX SAYS UNDERESTIMATED LOSSES OF JAPANESE FLEET

THREE JAPANESE CRUISERS AND FIVE DESTROYERS WERE LOST IN THE OCTOBER 11 BATTLE, SAYS SECRETARY OF THE NAVY; EQUIPMENT REACHES THE SOLOMONS.

BULLETINS.

Secretary of the Navy Frank Knox says that this nation has underestimated the Japanese naval losses in the Pacific war, according to recent information from the Solomons. He said in the October 11 naval battle, the Japanese lost three cruisers and five destroyers, the original claim including only one cruiser and four destroyers sunk. Without being too optimistic, he said the fleets of the two nations are assembling in the battle area for a showdown battle. A great American fleet is ready to match its forces against the Japanese vessels.

◆ ◆ ◆

New equipment has reached the Solomons, including guns, tanks, planes, and men. The Marines and army have started an offensive on Guadalcanal. The Australinas have captured Kokoda, Japanese held base on New Guinea, and are continuing after the enemy.

The Japanese retreat continues on Guadalcanal Island, the navy said, also announcing that American submarines had sunk seven more enemy ships in the Far Pacific.

The Japanese withdrawal began Sunday after the Americans unleashed a battering assault by dive bombers, Flying Fortresses, fighting planes and a small force of Marines. The Marines crossed the Matinikau River, attacking to the westward, and one wave of the devil dogs made an advance of two miles with comparatively few casualties, a communique said.

While Flying Fortresses supported this thrust by hammering the withdrawing foe, American fighter planes and dive bombers strafed and blasted at enemy positions throughout the day.

TO ALASKA ON RUBBER.

Opening of the new motor road to Alaska, months ahead of schedule, is a war achievement of which every American can be proud, says the Dallas News. Use of this new military highway will rescue Alaska from much of that territory's former isolation, will make the defense of Alaska and the Aleutians much easier and will facilitate the shipment of fish, furs and minerals from Alaska to the United States. Thousands of Army trucks already are speeding over the new road, which is expected to be kept open all winter.

The present road, built quickly for emergency use, is neither as wide nor as smooth as the one contemplated for eventual construction for tourist travel and trade. But it should serve the present needs well, and improvements made from time to time can convert it into a broad highway comparable to the best in the United States. It is the work of United States Army engineers but will be turned over to Canada at the close of the war.

Transportation of military supplies to Alaska by truck will be more expensive than carrying them by water but will keep the supplies beyond the reach of enemy submarines and will release ships needed on other supply routes. In addition, it will help to open up new territory from which we may get strategic materials hitherto unavailable. Whatever its temporary drawbacks, the new road is a major project in strengthening America's defenses.

VICTORY TAX

The biggest tax increase ever voted on individuals, the five per cent victory tax on all income in excess of $624 a year, effective the first of next January, has become a reality with adjustment of Senate and House differences in the new revenue law. In most cases, it is expected that the victory tax will be deducted from wages and salaries before they reach the hands o ftaxpayers, although exact details have not yet been worked out by officials of the Treasury Department.

The taxpayer will be allowed a flat deduction of $12 a week and credits for debt reduction, insurance payments, and war bond purchases. After the war the law provides rebates of 25 per cent of the tax paid, up to $500, to single persons, and 40 per cent, plus two per cent for each dependent, up to $1,000 ,to married persons.

The victory levy is in addition to a normal income tax rate of six per cent and surtaxes ranging from 13 to 82 per cent, with personal exemptions reduced from $1,500 to $1,200 for married couples, from $750 to $500 for single persons, and from $400 to $350 for each dependent.

The five per cent tax is expected to yield about $3,500,000 yearly, of which about $500,000,000 would be returned to taxpayers after the war. Legislators say this is the biggest single tax increase on individuals in history.

Specifically, it would add $70.35 net to the yearly tax bill of a single person with $2,500 gross income, $56.28 to the bill for a married person with no dependents and the same income, and $52.53 to the amount paid by a married person with two dependents .

GERMAN-OCCUPIED COUNTRIES FORCED TO STARVATION DIET.

Armies of Germany have plundered the food stocks of occupied countries in Europe to such an extent many nations which formerly exported food now are existing on a starvation diet, the inter-allied information committee declared at London.

The committee's statement was issued in comment on Reichsmarshal Goering's promise to the German people that whatever happens to the rest of Europe this winter, Germans will not suffer from want of food.

The committee gave this summary of the food situation of the food situation in some of the occupied countries:

Belgium: The people are living mainly on bread and turnips.

Czecho-Slovakia: The meat ration is 10½ ounces a month, compared with 17½ ounces in October, 1939.

France: The meat ration is three and a half ounces a week.

Greece: By agreement between the Greek and British governments, a number of food ships have been sent to Greece.

Holland: Meat is difficult to obtain despite an official ration of five and one-quarter ounces a week because Germans take what they need when their own supplies run short.

Poland: Although a large producer of grain, potatoes, and sugar before the war, Poland has been reduced to starvation by German demands.

Norway: The Germans have ordered the Norwegians to slaughter another 200,000 head of cattle, one-seventh of the nation's pre-war stock, to provide meat for the reich.

Coast Guard Is In Need Of Men

Men who want to enlist in the Coast Guard from now on will have to do so before they are ordered to report for army induction.

Lieutenant. Commander V. F. Tydlacks, in charge of Fort Worth area recruiting, announced today that hereafter no one will be accepted for enlistment in the Coast Guard after receiving notice from his selective service board to appear for induction into the army.

The new order is expected to curtail drastically the last-minute "shopping" for a particular branch of the service which has characterized recruiting for the last several months—and, indidentally, added many a gray hair to the heads of draft board members trying to fill their quotas.

However, enlistments in the Coast Guard will continue at full capacity for all men whose induction date has not been set. Applicans should first obtain a release from their draft board, then write or visit the offices in Fort Worth, San Antonio, Wichita Falls, Amarillo, Dallas and Waco.

Rev. Petter Writes Poem, Entitled "To Those Who Fly"

The following poem was written by Rev. William J. H. Petter of Greenville, Rector of St. Peter's Episcopal Church. The poem is as follows:

"TO THOSE WHO FLY."

New Planets sweet view
Sunlight on silver wings
Bodies straight as arrows
Reflecting morning rays.
Shimmering lovely things
Against a deep blue sky.
Not dead cold burned out worlds
But throbbin leaping life
Without whirling motors
Swift adventurous minds
Bodies of youth who soar
Free, certain, unafraid.
Dear God, who sent erstwhile
The swiftly moving orbs
Into uncharted space,
Put thy protecting arm
About those new roamers
Peopling thine upper world.
Let them not, like meteors
Fall broken to blackness
But if perchance storm clouds
Should prevail, or lightning
Strike with tearing fury
Or the far more bitter
Tongue of enemy flame
Let their treed spirits soar
Upward to endless light.

Lasting beauty and protection

DU PONT House Paint keeps white houses *white*, because this brilliantly white paint is "self-cleaning." It forms a tough, durable film which protects the surface from rust, rot, or decay. Like all paints, it collects dirt on exposure to the elements. As time goes on, however, a fine white powder forms on the surface of this new paint. This powder is washed away by heavy rains, carrying the dirt with it and exposing a fresh white surface. This self-cleaning process starts after a few months of exposure under normal conditions of weather, but may be delayed under unusual dirt-collecting conditions such as found in sooty industrial areas. Because the "self-cleaning" process is gradual, the wearing qualities of the paint film are not abnormally affected.

Back To God And His Word

By J. L. PUMMILL.

Hebrews, Chapter II. Ver. 4. By faithe Abel offered unto God a more excellent sacrifice than Cain, through which he had witness borne to him that he was righteous. God bearing him witness in respect to his gifts: and through it he being dead yet speaketh.

Verse 7. By faith Noah being warned of God concerning things not seen as yet, moved with godly fear, prepared an ark to the saving of his house; through which he condemned the world, and became heir of righteousness which is by faith. Verse, 8 By faith Abraham, when he was called to go out into a place which he should after receive for an inheritance, obeyed; and he went out, not knowing whether he went.

What is Faith? Paul, said, Faith is the assurance of things hoped for, the evidence of things not seen, Heb, 11:1.

How does one obtain faith? Romans. 10:17, Paul, said, So then faith cometh by hearing the word of God.

When God told Cain and Abel to make a sacrifice on the altar. He told them what to offer. Abel offered what God Commanded him to offer, but Cain offered the thing that was most convenient for him. Possibly God had respect for Abel's ofefring, but not for Cains.

When God told Noah to build an Ark, Te told him just how to build it. Genesis 6th chapter. Noah built it just like God commanded him. Therefore, he was saved by doing what God commanded. When God told him to put one window and one door in the ark, if he had put more it would not have been by faith and would not have saved him and his family.

When God told Abraham to get up, leave his country, his kinfolks and all other things that were dear to him, he never once asked God why he wanted him to do it, but got up and went.

Several years after Abraham left his country as God had comcanded him, God promised him a son, long after the time when by nature they could have one. Abraham believed that the son should be born as God had promised him. Time rolled on. The son was born as God had promised. When he was about twenty-five or six years old, God told Abraham to take him to Mt. Moriah and offer him as a sacrifice. Hebrews. II:17-19. By faith Abraham offered up Isaac. Abraham had so much faith in God and his word, that he was sure if God wanted to bless the world through him offering Isaac as an offering, that he would accomplish the work he intended to.

What the world needs today is men and women, who are willing to read God's word, then do just what God commands and look to God for the blessings.

Too many of us are like Lot, Abraham's nephew. When Abraham and Lot were traveling together, their herds increased until it became necessary for them to separate. Abraham told Lot to take what he wanted and ne would take what was left. Lot pitched his tent toward Sodom. Too many of us have pitched our tents toward Sodom. Lot saw a chance to make more money there, but never once considered what would be he final outcome. By reading the thirteenth chapter of Genesis we can see just what happened to Lot and his family.

We have given all our time to make money and enjoy life that we have forgotten God and his word.

Why not resolve that we will take time to read God's word, then do what He has commanded?

Get Head Start On Next Year's Vegetable Garden

Getting a "head start" on next year's vegetable garden is a good idea, especially for people who do not have thriving fall gardens.

Miss Charlotte L. Boyce, County Home Demonstration Agent, says there are a number of ways to prepare for successful spring gardens long before the seed catalogues begin to arrive.

First, the family should plan, Miss Boyce says, and the garden should be part of the overall plan for the year's supply of food and feed. A guide to planning for the family's food and feed supply can be obtained from the offices of county Extension Service agents. A family of five, for example, should plan to have at least a dozen kinds of vegetables, 20 bushels of potatoes, plus plenty of dried peas and beans, home-produced grain, berries, fruits, melons, and syrup. Seeds of most vegetables will be adequate for next year's gardens, Miss Boyce says.

Second, gardeners can plant a winter cover crop on their garden plots to hold down the soil and increase fertility. This is especially important since nitrates will be scarce and only commercial growers will be entitled to commercial nitrogen. Cover crops planted this fall can be turned under early next spring to build up the soil.

Third, Miss Boyce advises, start a composit heap containing auaumn leaves, dead flowers, lawn clippings, and table scraps. In the spring when the garden plot is plowed or spaded, the compost can be spread over the garden plot.

Speed Limit 35 Miles An Hour To Be Enforced

E. N. Brandon, State Highway Patrolman of McKinney, calls attention of McKinney and Collin County motorists to the new State and Federal law governing speed limits on the highways. The new speed limit is 35 miles per hour on highways in the country and will be strictly enforced. He urges motorists to comply with the law and make it unnecessary to make any arrests, but that if anyone is apprehended exceeding that limit, officers have no other recourse but to make an arrest.

Highway department signs regulating the speed to 35 miles an hour or less are up in this county and elsewhere, keeping motorists reminded of the new limi.

Speed limits of individual cities will continue to be regulated by the cities, the speed limit in McKinney being 30 miles an hour.

Lieut.-Colonel A. N. Wilson Is Lion Club Speaker

The annual party given by members of the McKinney Lion Club for their wives and sweethearts was held in the dining hall of the First Methodist Church Thursday evening. The meeting was presided over by C. H. Blewett, President and was opened by the singing of "America" by the Club and guests, led by the Lion sweetheart, Mrs. Jo Largent.

Dr. R. L. Cowan gave the invocation. A delicious three course dinner was served by the Ladies of the First Methodist Church Mr. Blewett presented the Master of Ceremonies, Dr. C. J. Hicks.

Dr. Hicks stated in his opening remarks that the program committee for Ladies Night decided this year to have less noise and more thinking in the evening's entertainment. He then presented Hal Dyer, who in well chosen words gave an impressive toast to the Ladies, comparing the high esteem in which woman is now held with her status in Biblical times and also in other countries. He also called to our attention the many responsible positions held by women today and the contribution they have made to the progress of the world. The next number on the program was a group of songs given by Mrs. Joe Largent. The first was composed by a Frenchman during the first world war and was the story of a blind French soldier's impression when American troops arrived in France. Mrs. Largent responded to an encore with the "White Cliffs of Dover" and "Buy Bonds."

Lion Hicks introduced the speaker for the evening, Lieutenant Colonel Alexander N. Wilson, who brought an interesting address. In his opening remarks Lieutenant Colonel Wilson paid tribute to the Texas heroes in World War I and called to our minds the fact that many Texas heroes had already been in World War II. He also contrasted the ideals of a Christian Democracy to those of the philosophy of the Pagan countries with which we are at war. He spoke in the highest praise of Winston Churchill, Stalin and Chiang Kai-Shek, claiming for them the greatest leadership their respective countries had ever produced. He also paid the highest tribute to our own President, Mr. Roosevelt, designating him as the greatest leader of the century in all the world.

In his address, Lieutenant Col. Wilson urged that we realize that this war has just begun and we each have a definite part in it and some of the ways we can help tc win this war is to buy more bonds, lend our help to the farmers and encourage them to raise more of everything, that is essential to the war program.

He also urged that we make clear to our representatives in Washington what the pople want and he pleaded that we back our President and let him know that you are behind him.

Lt. Col. Wilson closed this masterful address by paying tribute to the United Sates flag saying that in every pure white star is the smile of our creator and that this flag will never go down if we do our part.

At the conclusion of this very splendid address the meeting was adjourned with the singing of the Lions' song "I'd rather belong to the Lions."

PROCEDURE USED IN BUYING DISTRIBUTING FEED WHEAT

County Agricultural Agent Jack McCullough of this city calls attention to these Editors to the procedure used in some counties in getting up a successful program of buying and distributing feed wheat. It is suggested that the wheat be purchased through Commodity Credit Corporation of Kansas City, Missouri, since producers can secure wheat in this way without putting up a bond. Such producers, in order to qualify to buy feed wheat, must be certified as producers by the county AAA chairman. The wheat is not shipped in sacks, but in bulk and producers buying the wheat will be expected to provide their own sacks. The producers find it advantageous to employ a car clerk to check the unloading and that it is also advantageous to have at least four men at the car to fill and weigh the sacks. These producers designate a banket to collect for the wheat and pay the bill of loading on the car's arrival, which is ordered in the name of a certified producer. Upon the arrival of the cars the producers have been able to open them even though the bill of lading and draft have not been received by advancing 25 percent of the purchase price.

"I believe the price per bushel F. O. B. Collin County would be near ninety-five cents (95c.)" says the County Agent.

Mike Alvarado Pleads Guilty To Charge Of Murder

Mike Alvarado, indicted by grand jury for the murder of Rudolf C. Canan about March 1 of this year, whose body was found on Highway 75 North of Plano, was tried Saturday in Fifty-Ninth District Court in this city, with Judge Tom Suggs in charge.

Proof showed that the defendant was under the age of 17 when the crime was committed and Alvarado was tried as a juvenile delinquent and the case transferred to the juvenile docket of the District Court.

Hon. Wallace Hughston was appointed by the Court to represent the interests of Alvarado.

Alvarado pleaded guilty to the offense, charging him with murder with malice aforethought of Rudolf C. Canan, and was adjudged guilty of murder. He was given to the custody of Sheriff W. E. Button to be delivered to the Superintendent of the State School for boys at Gatesville and there to be confined for an indeterminate period not longer than the day he reaches his twenty-first birthday. Sheriff Button planned to tae him to Gatesville Friday of this week.

Canan Identified.

Rudolf C. Canan, our readers will recall, was identified March 3, with the finding of a billfold several miles from the place where his body was found. He was a son of J. J. Canan and wife of Conception Del Oro, Old Mexico. However, he had been living with his foster Mother in San Antonio.

He was a graduate of the New Mexico School of Mines at Socorro, New Mexico, where he was an excellent student and an athlete. He was described by Mr. Boyd as a young man of high ideals and clean moral habits.

When found Mr Canan had a Bulova wrist watch, a road map and some loose change in his pocket. The finding of the billfold assisted Mr. Boyd, Sheriff Button and other officers in identifying the man.

The body was found by some Illinois motorists, March 1, on Highway 75. They notified City Marshall Jim Standifer, in Plano, who notified Messrs. Boyd and Button, who investigated. A bullet wound was found in his head. The body was brought to the McKinney City Hospital Monday for X-ray and to remove the bullet.

Caution Urged In The Handling Of Fire Arms

As the hunting season approaches, the Texas State Health Department urges caution in handling fire arms. More than 200 Texans were killed in 1941 as a result of carelessness in handling guns, and at this time when human lives are being snuffed out in the war that is enveloping the entire world, it is more than ever important that we should conserve human lives on the home fronts.

With the inauguration of meat rationing and the reduced supply of this particular food, there is a possibility of more hunters going into the field than has been the custom for many years.

"It is not enough to deplore the waste of human lives caused by the careless haldling of fire arms," asserts Dr. Geo. W. Cox, State Health Officer, "we should learn from the deaths of these victims the lessons of safety which will prevent this needless and shocking waste."

The State Department of Health suggests the following safety suggestions in handling guns:

While hunting be sure that the loaded gun is on safety until ready to fire. Never shoot without seeing your target clearly. Never crawl through a fence carrying a loaded gun. If hunting with a companion stay close to him. Do not strike the ground or wounded game with the butt of a loaded gun. Never scuffle while holding a loaded gun or point it at a person "for fun." Always unload a gun before attempting to clean it. Always unload guns before taking them into the home. All guns should be carefully put away in the home out of the reach of small children.
